

Mohd Injham

Front-end Developer

Indore, Madhya Pradesh 453441 • +91-7987909225 • inzamam2812@gmail.com • GitHub • LinkedIn

Front-end developer skilled in React.js, JavaScript, HTML5, CSS3, and UI frameworks like Bootstrap and MUI. Built projects including Blinq (URL shortening & analytics platform) and CivicPulse (community issue reporting platform), showcasing expertise in authentication, API integration, dashboards, and real-time data rendering. Seeking a junior front-end role to create responsive and user-friendly web applications.

SKILLS

Languages & Core: JavaScript, ES6+, HTML5, CSS3, Java, MySQL

Libraries & Frameworks: React.js, React Router, Bootstrap, Material UI (MUI), Framer Motion

Tools & Collaboration: Git, GitHub, RESTful APIs, Agile Methodologies (Scrum)

Soft Skills: Presentation, Team Collaboration, Adaptability, Continuous Learning

PROJECTS

CivicPulse — Community Issue Reporting Platform [\[GitHub\]](#)

Aug 2025 - Present | Team Size: 2

- Built a responsive web app for tracking local civic issues, reducing manual reporting by 80%.
- Implemented 4+ core modules (reporting, list, detail view, admin dashboard) using React.js, Material UI, Bootstrap, enhancing UI consistency and accessibility.
- Integrated REST APIs with JWT authentication and role-based access, securing 100% of user data.
- Refactored front-end components, cutting duplicate code by ~30%.
- Applied Agile practices with milestone tracking and peer code reviews for on-time delivery.

Blinq — URL Shortening & Analytics Platform [\[GitHub\]](#)

Sep 2025 - Present | Team Size: 2

- Architected frontend architecture with React.js & React Router DOM, achieving 90% component reusability and reducing development time by ~25%.
- Designed a Bitly-inspired responsive UI with Material UI & CSS, ensuring 100% mobile compatibility and improved user experience across devices.
- Engineered secure JWT-based authentication, reducing unauthorized access risk by ~40%.
- Integrated REST APIs for link management, QR code generation, and click analytics, designed for high traffic and fast response times.
- Delivered analytics dashboards with charts, enabling real-time insights into user engagement and traffic sources.
