## PROJECTS

### TourBooker — Tours & Activity Booking Platform

Mar 2026 - Apr 2026 | [GitHub](#) | [Live Demo](#)

*React.js, Node.js, Express.js, MongoDB, Stripe, Groq LLaMA, Leaflet, OpenStreetMap*

- Led development of a full-stack MERN-based tours and activity booking marketplace supporting User, Operator, and Admin portals with RBAC.
- Designed and implemented 40+ RESTful APIs for authentication, bookings, payments, reviews, messaging, analytics, pricing, and administrative workflows.
- Integrated AI-powered travel recommendations and a context-aware chatbot using Groq LLaMA 3.3 70B with MongoDB caching.
- Built secure Stripe payment workflows with webhook-based booking fulfillment, concurrency-safe slot booking, and automated email notifications.
- Developed reusable React.js dashboards and protected route architecture using Context API, React Router DOM, and Axios.
- Integrated geolocation search and mapping features using OpenStreetMap, Leaflet, and MongoDB geospatial queries.
- Implemented AI-driven sentiment analysis for customer reviews using HuggingFace Transformers with asynchronous processing and analytics dashboards.

### CivicPulse — Community Issue Reporting Platform

Aug 2025 - Present | Team Size: 2 | [GitHub](#) | [Live Demo](#)

*React.js, Node.js, Express.js, MongoDB, Material UI, JWT*

- Built a responsive web platform for reporting and tracking civic issues, reducing manual reporting efforts by approximately 80%.
- Implemented 4+ core modules including issue reporting, issue listing, detailed issue views, and an administrative dashboard.
- Developed RESTful APIs with JWT-based authentication and role-based access control.
- Refactored reusable frontend components, reducing duplicate code by approximately 30%.
